

Insafe Bankers Till - 3 Drawer

Programmable Drawers with Time Delay

**Payment drawer
with coin tray
and note tray
included**

**Large drawer
with cash box
included**

The Insafe Bankers Till Drawer (BTD) is an anti-attack device specifically produced for securing money deposits withdrawals as well as stamps, cheques, etc.

It has a mechanical lock for overnight use plus each drawer can be individually programmed with a cashier code and an optional time delay for user security. Drawers can also be programmed to be opened in 'slot mode' to allow insertion of banknotes without exposing the contents of the drawer.

The BTD safe records 1000 events independently of the supply voltage.

As an additional security measure the BTD can be connected to an existing building alarm system.

TILL DRAWER PROTECTION:

- Large drawer for security cash box • Payment drawer with trays for banknotes and coins
- Time delay (independent of external power supply) • Connectivity to alarm system

External Size	670h x 420w x 460d mm (Allow an additional 25mm depth for the handles & knob)		
3 Drawers	2 drawers for banknotes and coins	1 larger drawer for security cash box	
13 Codes	Master code x1	Manager codes x3	Cashier codes x9
