

Pentagon 5-Life Key System. Five Ways to Save on Lock Changes

Pentagon 5-life key system dramatically cuts costs while maintaining the highest standards of security and control. Pentagon cylinders can replace any standard cylinder and be fitted to most entrance doors on retail premises.

Example of Use.

1 Install the Pentagon 5-Life Key System

Only the GREEN keys are issued to staff. The others are held by your security department or Insafe.

2 Branch Manager Leaves Taking a Key

To change the lock simply insert the YELLOW key and turn. GREEN keys no longer work. No new lock or cylinder. No expensive call-out. No hassle. You start to make savings.

3 A Key is Lost

By using the WHITE key, both GREEN and YELLOW keys are rendered useless. Security is uncompromised, and more savings made.

4 New Manager Appointed

Insert PURPLE key and turn to invalidate all previous keys. Issue new keys speedily at no extra cost.

5 Keys are Stolen

Using the RED key will render all previous keys useless. Security has been continuously maintained and inconvenience minimised.

**Above all, you've saved the cost of four locksmith call-out charges
as well as the expense of four sets of hardware.**

Benefits.

Saves Money

No need to call out a locksmith.

Saves Time with Five Lives

Simply insert the next colour coded key and turn.

Fits Most Doors

Replaces all types of standard cylinders.

Key Control

Registered keys cannot be cut without authorisation.

Designed for Retailers

High quality for high frequency use.

Insafe Master Locksmiths.
Approved Member of The Master Locksmiths Association.

Locksmith Services.

Access Control

Insafe design, install and maintain access control systems for offices, health clubs, hotels, banks, ATM rooms and high-net worth clients. We also maintain any already existing systems.

Key Cutting On-site

Our Master Locksmiths vehicles carry three types of key cutting machines to cover most types of key.

Mechanical and Electronic Door Locks

Replace a lock and supply new keys, upgrade an existing lock / cylinder to customers insurance specs.

Non Destructive Access to Locked Doors

Our Locksmiths can gain access without damage to most locks, quickly leaving customers operational again.

Install and Maintain In-house Master Key Suites

Each lock has its own key which cannot open another lock but one 'Master Key' can operate every lock.

Strong Rooms, Cash Offices and Vault Door Locks

We install and maintain locks for vault / strongroom doors with resistance gradings of up to Grade 13.

Panic Hardware

Our Locksmiths carry out the installation and maintenance of fire exit and panic door hardware.
